

Tech Rider

VINYL POWER

shockwerk

Please note that we are a vinyl only crew.

The DJ booth should be in perfect conditions for playing vinyl!

Please read the requirements very well and make sure they are met.

In case of not meeting the requirements the artists can refuse performing.

A sound check is required more than 60 minutes before the doors are open.

This is extremely important, and most of the possible feedback problems are solved during it.

A qualified technician needs to be attending the sound-check and be available to the artist the entire duration of the show.

shockwerk

Equipment

DJ Mixer

1x Pioneer (AlphaTheta) Euphonia

Make sure that the DJ Mixer is directly running into the Main PA and the Booth Monitors
(not slaved through a different mixer)

shockwerk
